Sub: - Corporate Announcement - **Solix Common Data Platform Achieves Oracle Validated Integration with Oracle E-Business Suite 12.2.7** - reg.
Ref: - Our Scrip Code: 501421.

With reference to the subject cited above, Please find the enclosed public news item to be posted at the Corporate Announcement Section of the BSE website. We request you to do the needful at the earliest.

This is for your kind information and records.

Thanking you,

Yours truly
for **Technvision Ventures Ltd.,**

Diddiga Santosh Kumar
Company Secretary & Compliance Officer

Encl: As Above.

Solix Common Data Platform Achieves Oracle Validated Integration with Oracle E-Business Suite 12.2.7

Integration will enable enterprises to archive their Oracle E-Business Suite data using pre-built archiving templates

January 30, 2019 — Santa Clara, Calif. — Solix Technologies, Inc. (www.solix.com), a leading provider of enterprise archiving and big data applications, today announced it has achieved Oracle Validated Integration of the Solix Common Data Platform (CDP) 2.5 with Oracle E-Business Suite 12.2.7.

Solix Common Data Platform (CDP) helps enterprises organize, manage, and process all of their structured, semi-structured, and unstructured enterprise data. The Solix CDP integration with Oracle E-Business Suite 12.2.7 will provide enterprise archiving and database archiving capabilities, enabling organizations to archive legacy Oracle data. Archived data is structured into tiers based on its age, increasing operational efficiencies while retaining transparent end user access to the archived data. The Solix CDP provides pre-built archiving templates for over 50 of the most common Oracle modules.

"Solix CDP provides a powerful suite of data-driven tools for organizations to archive legacy Oracle E-Business Suite data, while still providing access to the data through the Oracle application," said *John Ottman, Executive Chairman at Solix Technologies, Inc.*

The Solix CDP is cloud-ready software. Key capabilities include:

- Object Workbench: Uniform data collection of structured and unstructured data, ETL and metadata repository.
- Data Governance Workbench: Sensitive data discovery, data masking and encryption, role based access control, retention management, ILM, GDPR, PHI, PCI and FISMA compliance frameworks
- Analyst Workbench: Data preparation, data visualization, search, business intelligence and analytics
- Test Data Management: Create intelligently sized database subsets, not clones, to reduce test data storage requirements by up to 80 percent
- Enterprise archiving and data lake: Real-time data hub architecture for scalable processing with low cost bulk data storage
- CDP API 1.0: Certified API support for Solix App Store solutions
- Object storage support
